ROAD MAP OF THE AIR ©

APPROXIMATE SCALE

Each grid square represents approximately 78,500 square miles or 203,000 square kilometers; 280 miles or 450 km. per side length, and diagonally, about 375 miles or 600 km.

NOTE: This chart is made up from best information available when going to press. Main routes are covered and secondary routes where possible. Because certain omissions and errors will occur, we would appreciate any such discrepancies being brought to our attention so that the necessary corrections may be made when next this "ROAD MAP OF THE AIR" is issued.
